CONTROLS, LLC

Produced Water Back Pressure Control Valve

Master Flo choke valves are relied on worldwide to provide reliable flow control in all service types. With over 100,000 choke valves manufactured, the expertise in choke valve sizing, custom trim and material selection for your specific application, custom engineering, and the life-of-field services to help you optimize production and lower costs.

GOT PUMPS?

Back Pressure Control Valves

The perfect valve to keep your pump in its curve! Disc chokes are commonly used to maintain back pressure on pumps, but are prone to failure caused by cavitation and erosion due to poor pressure recovery. MasterFlo chokes can mitigate or eliminate the effects of cavitation and erosion that can severely damage your critical equipment and piping systems. Less downtime, less maintenance, and best in class performance.

The Best Automated Wellhead Choke Valve in the Industry

GOT SAND?

Wellhead Choke Control Valve

- From the North Atlantic Sea, to the Northern Delaware Basin, MasterFlo is Field Tested & Field Proven to be the Industry Leader in Choke Technology.
- MasterFlo's Chokes have been Optimized to offer the most precise Controllability & Highest Rated CV's of any External Sleeve & Cage Choke on the Market.
- Built to last using Patented 5CB Tungsten Carbide, MasterFlo is proven to be the Most Erosion Resistant Production Choke in the World. Hands Down
- Designed with Actuation in mind, MasterFlo Chokes can be equipped with Pressure Balanced Trim which allows for drastically lower operating Torques than traditional Non-Balanced Trim Designs.
- When Paired with field Automation, Actuated MasterFlo Chokes have been proven to Reduce Downtime, Increase Operating Efficiency by over 900% , & Curtail Costly Flaring by up to 95%.
- All VanZandt customers can count on Free Training, Full Product support with Highly Capable field services, & Industry Leading Engineered Solutions to their toughest Choke Challenges.
